

## **Project Description**

This project involves the creation of an admin dashboard for a Library Management System. The dashboard allows users to manage book and author details efficiently. The system is designed to provide functionalities such as adding, editing, and deleting book and author records. Formik is used for form validations to ensure data integrity.

## **Key Features**

### **1. \*\*Book Management\*\***

- Users can manage book records, including details such as title, author, ISBN number, and publication date.
- Supported actions:
  - Add new book records
  - Edit existing book records
  - Delete book records

### **2. \*\*Author Management\*\***

- Users can manage author records, including author's name, birth date, and a short biography.
- Supported actions:
  - Add new author records
  - Edit existing author records
  - Delete author records

### **3. \*\*Form Validations\*\***

- Formik is used to validate all forms within the dashboard, ensuring data accuracy and preventing incorrect or incomplete submissions.

### **4. \*\*Responsive Design\*\***

- The dashboard features a clean and responsive design, making it easy to use and navigate across different devices and screen sizes.

## **Project Workflow**

### **1. \*\*Login Page\*\***

- Users start at the login page, where they enter their credentials to access the admin dashboard.

### **2. \*\*Home Page\*\***

- After successful login, users are directed to the home page.

- The home page contains two buttons: "Book Details" and "Author Details."

### 3. **Book Details**

- Clicking the "Book Details" button navigates users to the book details page.
- Here, users can view a list of books with information such as title, author, ISBN number, and publication date.
- Supported actions:
  - **Add Book**: Users can navigate to the add book page to fill out a form for adding a new book record.
  - **Edit Book**: Users can navigate to the edit book page to modify existing book records.
  - **Delete Book**: Users can delete book records.

### 4. **Author Details**

- Clicking the "Author Details" button navigates users to the author details page.
- Users can view a list of authors with details like the author's name, birth date, and a short biography.
- Supported actions:
  - **Add Author**: Users can navigate to the add author page to enter details for a new author record.
  - **Edit Author**: Users can navigate to the edit author page to modify existing author records.
  - **Delete Author**: Users can delete author records.

### 5. **Database (db.json)**

- The application interacts with a database (e.g., `db.json`) to store and retrieve book and author records.
- The database maintains data integrity and ensures that changes made through the dashboard are persisted.

## **Technologies Used**

- **React**: The front-end of the admin dashboard is built using React, providing a dynamic and responsive user interface.
- **Formik**: Formik is utilized for form management and validation, ensuring that data entered by users is accurate and complete.
- **React Router**: React Router is used for navigation within the application, allowing users to switch between different pages and sections seamlessly.

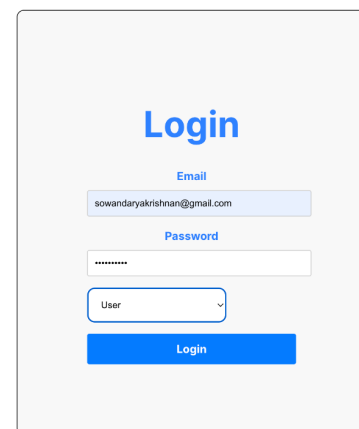

- **Responsive Design**: CSS and responsive design principles are applied to ensure the dashboard looks and functions well on various devices and screen sizes.

- **JSON Server**: A JSON server (e.g., `db.json`) is employed as a backend to store and manage book and author records.

## Conclusion

The Library Management System Admin Dashboard provides a user-friendly interface for administrators to manage book and author details efficiently. It employs modern web technologies to ensure data accuracy and responsive design for a seamless user experience. The use of Formik for form validations enhances the reliability and integrity of the data entered into the system.

Sample Screenshot :

A login form interface. It has a title 'Login' in blue. Below it are three input fields: 'Email' with the value 'sowandaryakrishnan@gmail.com', 'Password' with masked characters, and 'User' with a dropdown arrow. A blue 'Login' button is at the bottom.
